Release of Stored Pressure in the Hydraulic System

- ◆ Open **ALL** circuit valves on hydraulic bleed manifold.

Release of Stored Pressure in the Hydraulic System

- ◆ Open main dump valve to release stored pressure to the hydraulic tank.
- ◆ Hold dump valve open until pressure has been released and or movement of implements ceases.

Release of Stored Pressure in the Hydraulic System

Install an appropriate gauge on the tank return test fitting to ensure that no pressure exists.

Release of Stored Pressure in the Hydraulic System

- ◆ Bleed pressure from hydraulic tank.
